Email: arkadeepnc@cmu.edu

Cell: +1 412-626-4231

4225 Newell-Simon Hall, 5000 Forbes Avenue
Carnegie Mellon University, Pittsburgh, PA, ZIP: 15232

EDUCATION

Carnegie Mellon University

MS + PhD in Robotics

Pittsburgh, PA

Aug. 2020 – Dec. 2023 (expected)

Carnegie Mellon University

PhD in Mechanical Engineering

Pittsburgh, PA

Aug. 2018 – Aug 2020 (transferred to the RI)

Indian Institute of Science

Master of Science in Mechanical Engineering

Bangalore, India

Aug. 2015 – Dec. 2017

Indian Institute of Engineering Science and Technology

Bachelor of Engineering in Mechanical Engineering

Shibpur, India

Jul. 2011 – May 2015

EXPERIENCE

Atkeson Lab & Robotouch Lab, CMU RI

Graduate Research Assistant

Pittsburgh, PA

Nov. 2019 – Present

Advisor:

[Prof. Christopher Atkeson](#)

Thesis topic:

Active Sensing for Manipulation

Moving cameras: Developed an ensemble of collocated vision, depth and touch sensors and a set of algorithms to visually servo robots to workspace goals and localize objects through vision and touch. [IEEE RA-L '22 Link](#)

Moving lights: Designed and implemented a robot workspace scale photometric stereo setup for object agnostic, surface texture, surface orientation, and surface deformation perception. [In prep. for RSS '23](#)

CI2CV Lab, CMU RI

Graduate Research Assistant

Pittsburgh, PA

July. 2019 – Nov. 2019

Advisor:

[Prof. Simon Lucey](#)

Learning-Based Registration: Researched learning-based pose estimation algorithms – insights on why it works, what are the open problems.: [Short report](#).

Biorobotics Lab, CMU RI

Graduate Research Assistant

Pittsburgh, PA

Aug. 2018 - Jul. 2019

Advisor:

[Prof. Howie Choset](#)

Medical device prototype: Co-developed and prototyped a hand held soft tissue investigation device for low-cost tumor diagnosis. [Link](#)

Non-rigid registration: Surveyed algorithms for human organ registration and proposed and implemented faster algorithms with comparable accuracy to handle larger volumes of data. [Link](#)

Robotics and Design Lab, IISc

Research Staff

Bangalore, India

Jan. 2018 - Jul. 2018

Advisor:

[Prof. Ashitava Ghosal](#)

Optimal Motion Planning: Derived optimal, polynomial time motion plans for snake-like robots in confined spaces such as endoscopes, pipe inspection robots and in cluttered search and rescue scenarios. [Link](#)

Robotics and Design Lab, IISc

Graduate Research Assistant

Bangalore, India

Jul. 2015 - Dec. 2017

Advisor:

[Prof. Ashitava Ghosal](#)

Design of Parallel Robots: Designed Monte Carlo simulations to model workspaces of parallel robots. Modeled the human 3-fingered grasp and proposed techniques for optimal design of parallel robots. [Thesis](#), [paper 1](#), [paper 2](#).

Solid Mechanics Lab, IIST

Undergraduate Researcher

Kolkata, India

Jul. 2014 - Apr. 2015

Advisor:

[Prof. Debasis Datta](#)

Computational Design of Springs: Formulated closed form expressions for design of springs of un-conventional shapes to estimate their stresses, natural frequencies, buckling loads etc. [Link](#)

SELECTED COURSE PROJECTS

Planning on Manifolds: Devised algorithms for path planning of collaborative robot arms to manipulate ultra-sound probes on a human body phantom. This algorithm was later used to research automatic femoral artery catheterization. [\[Video\]](#)

SLAM for Legged Robots: Used GTSAM and OpenCV to co-develop a framework for visual state estimation in legged robots using their gait information. [\[Report\]](#)

SKILLS

Programming Languages: Python, C++, CUDA, Cython

Modelling Tools: Matlab, Maple (Symbolic Mathematics)

Computing Environments: Linux [Ubuntu]

Machine Learning Toolboxes: PyTorch, TensorFlow, SciKit-Learn

Software Libraries: ROS, OpenCV, PCL, GTSAM

Languages: English (full proficiency), Bengali (native proficiency) and Hindi (bi-lingual proficiency)

RELEVANT COURSES

At CMU: Computer Vision (16-720), Advanced Nonlinear Control Theory (16-748), Robot Localization (16-833), Geometric Methods in Computer Vision (16-822), Linear Systems (18-771), Statistical Techniques in Robotics (16-831), Deep Reinforcement Learning (10-703), Machine Learning (10-701)

At IISc: Robotics (Kinematics, Dynamics and Control), Numerical Linear Algebra, Geometric Modelling, Linear and Non-Linear Optimization,

AWARDS

DST-SERB Overseas PhD fellowship [Declined]	08/2018 – 08/2023
Graduate Research Fellowship (CMU)	08/2018 – 08/2019
DST Graduate Scholarship (at IISc)	08/2015 – 12/2017

RESEARCH INTERESTS

3D sensing for manipulation, tactile sensing, active perception, computer vision for robot learning and manipulation.
